

# JV-1010 64-Voice Synthesizer Module

Looks Small. Sounds Huge. And Expands Tremendously.

*Roland's JV-1010 64-Voice Synthesizer Module may look small, but it sounds huge! That's because this half-racksize wonder includes the full sound set of Roland's highly acclaimed professional JV-1080/2080 sound module, plus all of the sounds from the "Session" wave expansion board and a slot for installing an additional Roland's SR-JV80 Series wave expansion board of your choice. That means a staggering 1,023 high-quality Patches right out of the box, and over 1,200 Patches when expanded!*

- Compact half-rackspace expandable synth module with 64-voice polyphony
- Includes the complete sound set of the legendary JV-1080 and JV-2080 sound modules, plus the sounds from the "Session" expansion board (1,023 Patches total before expansion)
- Expansion slot for installing additional SR-JV80 Series wave expansion board of user's choice
- Intuitive knob-style control and straightforward interface  
Dedicated Reverb and Chorus processing, plus built-in EFX bank with 40 algorithms
- Easy navigation through Phrase Preview button and Category/Bank Select knob
- GM compatible
- Includes CD-ROM with sound editing software

## Sounds, Sounds and More Sounds!

Though small in size, the JV-1010 really packs a sonic punch. With the complete sound set of the world-renowned JV-1080/2080 sound module (640 Preset and 128 User Patches), plus all 255 Patches from the Session wave expansion board, this diminutive sound module boasts some of Roland's very best Patches—stereo grand pianos, acoustic guitars, Juno, Jupiter and TB-303 synth sounds, and 18 full rhythm sets, to name a few.

There's also a built-in expansion slot for installing any of Roland's SR-JV80 Series wave expansion boards, giving users hundreds of additional sounds in genres ranging from Asian and Orchestral to Hip-Hop and Techno. And best of all, the JV-1010 offers full 64-voice polyphony and 16-part multitimbral capability—plus the same dedicated Reverb, Chorus and EFX (multi-effects) processing as the JV-1080—ensuring that sound quality is first-rate.

### Quick, Easy Operation

To help users navigate through this wide array of sounds, JV-1010 Patches are grouped into categories (Piano, Key/Organ, Guitar/Bass, etc.) and banks which can be selected with a simple Category/Bank Select knob. A Phrase Preview function plays back the selected tone in a short musical phrase, while a built-in headphone jack allows quick confirmation of sounds and operation. Sound shaping can be accomplished via the bundled CD-ROM, which includes sound editing software for Mac and PC, used in conjunction with the JV-1010's rear-panel computer interface.

### Specifications

---

#### Parts

16 (Part 10: Rhythm Part)

#### Max. Polyphony

64 voices

#### Effects

EFX: 40, Chorus, Reverb (8 types)
