

RD-150 Digital Stage Piano

An Affordable Stage Piano with Uncompromising Action and Sound.

The RD-150 Digital Stage Piano was built around the concept that an entry-level stage piano should still feel and sound like the real thing. That's why its 88-note keyboard uses an improved hammer action that responds like digital pianos costing hundreds more. And with an upgraded sound engine that's equally realistic, the RD-150 sets a new standard for affordable digital pianos.
