

# G-70 VERSION 2 **OS2** Version 2

## The best just got better!

With over 20 new features and 10 new Music Styles (plus 10 Music Assistant registrations), the G-70 Music Workstation once again sets a new standard!

**20 NEW FEATURES**

**10 NEW MUSIC STYLES**

### New Guitar Mode

The G-70's new Guitar Mode expands keyboard players' horizons with perfect guitar riff simulations (acoustic and electric) – in realtime. This cutting-edge function provides several down- and up-stroke patterns, realistic muting and other guitar techniques, all controllable from the G-70's keyboard. The G-70's Guitar Mode is so authentic, it will take your (and your audience's) breath away! The Guitar Mode is also an invaluable programming tool for live-feel guitar phrases in your Standard MIDI Files and Music Styles (available in 16-Track Sequencer and the User Style Composer modes).

### Expansion sounds in Styles and Songs

OS version 2 at last allows you to assign any Tone or Drum Set of an installed expansion board (option) to Song and Style tracks. It even provides an Auto Sync function for perfect tempo matching of any loop or phrase you select from that board.

### Style Converter

Turn any Standard MIDI File into a fully functional Music Style with the Style Converter function in the 16-Track Sequencer environment.

- **Piano Roll Editing** in 16-Track Sequencer and User Style Composer modes for a clearer view of which track plays what.
- **Customization of the Melody Intelligence Tone**  
The Tone the Melody Intelligence function adds to the chosen harmonization can now be freely selected.
- **Vocal Harmonist Control in 16-Track Sequencer and Via MIDI IN**  
The Vocal Harmonist has become MIDI controllable and can now be controlled from an external device if you need to use the keyboard for other purposes.
- **Make Up Tool Freeze** function that allows you to save your Song and Style changes for universal SMF compatibility, and more flexible Song and Style editing.

- **Style Mixer Solo** function
- **Break mute** function for ASSIGN SW buttons
- **User Program set** can be copied to floppy disks
- **Intro/Ending** count down display
- **ACV code insertion** facility
- **Multiple-note insert** function (for chords) in 16-Track Sequencer and User Style Composer modes
- More flexible **note gate time editing** in 16-Track Sequencer and User Style Composer modes
- **Multiple selections** for the **delete** function in Disk/Media mode
- **Sound addresses (CC00/CC32/PC) displayed** on most **Tone, Style and User Program** pages
- **Melody Intelligence** can now be **linked to style selection**

- **Song/Arranger start priority** function that prevents the selected song (or Style) from being started while a Style (or song) is running
- **Scale Tuning** for Style parts
