Version 2.0 Update: Full Power for Stage and Studio

With the new GT-100 Version 2.0 update, BOSS' flagship multi-effects processor is now even more powerful than before. Available as a free download at BOSS TONE CENTRAL, the update is simple to install and brings a host of great new features to the GT-100's already formidable arsenal. Two new amp types have been added, along with cutting-edge MDP effects and newly developed Rotary 2 and Acoustic Guitar Simulator effects. A convenient Guitar-to-MIDI function is included as well, letting you enjoy playing soft synths in Guitar Friend Jam and other computer software using your normal guitar. The GT-100's USB capabilities have been expanded too, providing greater flexibility for re-amping applications. And with the BOSS TONE STUDIO software, you can now edit GT-100 patches from a friendly graphical interface on your computer.

Edit and Organize Sounds with BOSS TONE STUDIO

Available as a free download for Mac or Windows, BOSS TONE STUDIO gives you an intuitive graphical interface for creating and editing GT-100* effects patches from your computer via USB. The software also makes it easy to organize and archive patches, and to load them as needed for different gigs and recording sessions. If your computer has Internet access, BOSS TONE STUDIO provides an integrated connection to the BOSS TONE CENTRAL website, where you can preview and download free gig-ready patches created by top guitar pros directly into the GT-100.

GT-100 Version 2.0 software is required for compatibility with BOSS TONE STUDIO.
