

HPI-7S/HPI-6S

Digital Piano

Full-Featured Performance, Fun & Friendly Education

Roland's HPI-series pianos with DigiScore provide ingenious ways to get your child to sit down at the piano and practice without losing interest. Your child will acquire a solid foundation in the fundamentals of piano while having a great time playing. It's fun and exciting, but musically enriching!

ROLAND PIANO
DIGITAL

- Extra wide, easy-to-read color LCD display enhances Roland's unique DigiScore notation
- 88-key stereo multi-sampled grand piano sound and a 4-speaker sound system
- PHA II (Progressive Hammer-Action II) "Ivory Feel" (HPI-7S) keyboard with Escapement
- Newly designed cabinet with front legs for a stable and stylish piano look
- "Visual Lesson" feature for interactive practice acts, always available, music tutor
- A wider variety of educational games, including Roland's acclaimed "Wonderland," for fun and interactivity in the learning environment
- DoReMi course provides friendly sight-reading and fingering lessons for beginners
- Audio song playback in any key for play-along fun: .WAV file from a USB memory key or audio CD with optional USB-CD drive
- HPI-7S supports VIMA TUNES™, allowing slideshows and lyrics to be displayed on an external monitor

Interactive Learning

Built into the HPI series are Roland's top interactive educational tools: DigiScore, Visual Lesson, DoReMi, and Wonderland. The extra-wide DigiScore LCD screen is built into the music rest for easy viewing. It displays the notation, complete with a "bouncing ball" and automatic page turning. The Visual Lesson feature acts as your personal interactive music tutor, with three courses, while Wonderland and DoReMi course are as fun to use as games.

HPI-7S

HPI-6S

Wonderland

Wonderland is the program that, with amusing animation, attracts children while teaching them the sounds of musical instruments and sound effects. Children can learn all about pitch and chords within the friendly form of a game. It's so fun, even adults will find themselves absorbed.

Wonderland Screen

Tones Screen

Visual Lesson

From three courses, you can select the one that suits your level. As you play, the keys you press are displayed onscreen and in real time as musical notation. When you finish playing, your grade for note accuracy and rhythm is displayed. You can pinpoint, with your eyes and ears, just where you need to improve, and have fun as you improve your skills.

Practice Screen

Check Screen

DoReMi Course

It's a perfect way for beginners to learn the fundamentals of piano: pitch, rhythm, sight-reading, fingering, and the "thumb under" technique. This interactive system is designed for players of all ages and skill levels, with onscreen illustrations that display correct fingering. Presented in a game format, DoReMi allows you to easily improve your fingering skills while having fun.

Supreme Keyboard Feel & Action

The HPI-7S features Roland's acclaimed PHA II "Ivory Feel" keyboard with Escapement. This amazing keyboard technology reproduces the real surface feel of ivory acoustic piano keys providing a familiar stability and comfort to the pianist. The white keys have a two-piece structure which reduces the surface 'click' noise when playing. The newly developed keyboard surface material is designed to absorb moisture, ensuring a secure, slip-proof feel that your fingers will love. The authentic coloration can also be seen on the side of the white keys.

Stunning Piano Sound

Your ears won't believe how realistic the 88-key concert-grand engine onboard the HPI-7S sounds, with individual multi-samples for every key. It's touch responsive to the subtlest pressure and nuance — from the deepest, most powerful bass to the most delicate high notes.

microjazz

BOOSEY & HAWKES

For onboard music data, the HPI series includes 50 sampler songs from the acclaimed Microjazz catalog, a world-famous series of pieces based on classical technique yet using popular contemporary styles such as jazz, blues, rock and funk. Combining Microjazz's music with the Visual Lesson features of DigiScore, you can add an exciting interactive dimension to practice and performance.
