# Flagship Features at a Nice Price

Roland raised the stage-piano bar with the RD-700NX. Today, the world-famous SuperNATURAL sound and expression of the flagship RD is available at a lighter weight and more affordable price ... introducing the RD-300NX! This state-of-the-art stage piano boasts an advanced SuperNATURAL Piano sound engine, E. Piano sounds based on SuperNATURAL technology, a newly developed Ivory Feel-G keyboard with Escapement, a unique Sound Focus feature, and more.

## SuperNATURAL Piano Sound

The RD-300NX's acoustic-piano sounds are derived from Roland's acclaimed SuperNATURAL Piano sound engine. With SuperNATURAL Piano technology, three essential elements are dramatically improved — velocity response, note decay, and key-range behavior — resulting in smooth, natural sound and response.

## E. Piano based on SuperNATURAL technology

For EP lovers, the RD-300NX contains an E. Piano based on SuperNATURAL technology that meticulously models classic vintage EPs.

Piano

## New Ivory Feel-G Keyboard

The newly developed Ivory Feel-G keyboard incorporates Roland's most advanced sensor, escapement mechanism, and Ivory Feel features. The keyboard provides the superior touch and sensitivity of Roland's flagship keyboards, in a compact and lightweight design... a great benefit for gigging musicians who want to travel light.

## Unique Sound Focus

The innovative Sound Focus feature ensures that every note will be heard, even subtle *pianissimo* passages. Based on advanced phase-correction technology, this essential feature prevents the RD-300NX from getting lost in the mix, penetrating through walls of sound without compressing or coloring the tone. Players can relax and play naturally, achieving presence onstage without sacrificing dynamics and sound quality.

## Bonus Features

The popular One Touch Piano concept from previous RD-series pianos has been carried over the RD-300NX, providing instant access to essential piano and E. Piano sounds and setups with dedicated one-touch buttons. With enhanced parameter such as String Resonance, Duplex Scale, and Hammer Noise editable via graphic LCD, the RD-300NX makes it fast and easy to create custom pianos.
