

# SA-1000

## Stage Amplifier

Roland®

## Compact, Lightweight, High-Power Stage Amp

The SA-1000 is a super-lightweight and portable stage amp customized for use with organs and digital pianos. In addition to being easy to operate and simple to set up, it reproduces every sound nuance from powerful bass to sparkling highs.

Note: While two SA-1000s can be used as a stereo pair as pictured, each SA-1000 is sold separately.

### Optimized for Organ

Organists will love the clean, clear sound of the SA-1000. And not just at home, the SA-1000 can easily travel from room to room, venue to venue. It's perfectly suited for a wide range of venues and events, from parties and special occasions to recitals and concerts in halls from small to large.

### Expand Your Sound with a Single Touch: Organ Enhance

If you want to impress your audience with a grand, climatic sound, just press the Organ Enhance button. As soon as Organ Enhance is active, a vigorous mid- and low-frequency enhancement occurs, while crystal highs remain.

#### Rear Panel

### Feedback Eliminator

The built-in Antifeedback function automatically cancels unpleasant howling. Thanks to this show-saving feature, the SA-1000 can be placed in once-problematic locations, such as behind the player, providing both onstage monitoring for the performer and audio projection to the audience.

### Double Your Power with Stereo Link

The SA-1000 is equipped with Stereo Link, a useful feature that allows two SA-1000s to be cascaded into a PA system for small-scale performances and concerts. With Stereo Link, both SA-1000s combine for a total of 700 watts of power.

#### Setup Example 1

**Audience Seats**  
For a small event of 50 people

#### Setup Example 2

**Audience Seats**  
For concert venue of 200 people
