## Take Full Control of the GAIA SH-01

GAIA Synthesizer Sound Designer is a specially designed PC/Mac software application for Roland's award-winning GAIA SH-01 synthesizer. It inspires creativity by allowing GAIA users to conveniently explore every tone parameter on their large computer monitors. The software can also record and play back the entire sound-creation process, step by step, with its unique Action List function. Furthermore, the Wave Viewer function displays each waveform as a graph for visual reference. Beginners of synthesizer programming and pros alike will appreciate this powerful and inspiring application, as well as teachers of synthesizer programming.

SD-SH01

\* The screenshots may be different from the actual product.

- ▶ Control every GAIA SH-01 tone parameter on PC or Mac
- ▶ Action List lets you record and play back the entire sound-creation process, step by step
- ▶ Wave Viewer display allows waveform shape to be viewed as a graph
- ▶ New GAIA SH-01 patches included, plus Action-List samples for learning the fundamentals of synthesis
