

# UM-1X

## USB MIDI Interface

Edirol's 1 in-1 out MIDI interface is new and better than ever! Now with the UM-1X, you get MIDI Signal Indicators to quickly see when MIDI information is coming & going out of the computer, and a selection switch to choose between OS Standard drivers (Mac OS X only) & our own advanced drivers.

The UM-1X is designed to offer a complete cable connection from the USB port of the computer to the MIDI ports of your MIDI device bypassing any additional cabling needs. The UM-1X has been redesigned to make it not only the most convenient 1x1 MIDI Cable interface, but also the best looking.

## Main Features
