

Real Time HD-SDI to MPEG-2 TS Conversion for Blu-ray

Finally a way to archive and/or distribute your hi-def material on convenient blu-ray media. The EDIROL VC-50HD converts from SDI to a 1394 (Firewire) that is readily received by JVC Blu-ray Recorders. Whether your signal is coming live from an HD-SDI production switcher or from a dedicated HD deck, the VC-50HD in combination with the recorder is the perfect combination for getting a quality blu-ray copy.

The VC-50HD also enables convenient monitoring via the HDMI output as well as support for three different types of power supply: AC power adaptor, AA batteries, and external battery support.
