

## GT-100 System Program Ver.2.03

---

### How to tell the version

Please check the version of the system working on your GT-100 before downloading the archive file.

1. Hold down [ **EFFECT** ] button and [ **SYSTEM** ] button, and press and hold POWER switch.  
The left display will show the current version number at "Ver."
2. Press and hold POWER switch to turn off the power.

\*Don't perform the update if the product is already up-to-date.

---

### Update history

#### [ Ver.2.03 ]

Bug Fix

The following bugs were fixed.

- When PREAMP was set to a specific value, the sound sometimes did not play as set.

- MIDI System Exclusive messages were sometimes not received correctly.

#### [ Ver.2.02 ]

Bug Fix

The following bug was fixed.

- Inconsistencies in some parameter values occur when using BOSS TONE STUDIO for GT.

#### [ Ver.2.01 ]

Bug Fix

The following bug was fixed.

- A problem in which edits made to GT-100 Ver.2 failed to be applied to BOSS TONE STUDIO for GT was corrected.

---

## **How to update your GT-100 to Ver.2**

Various functions are added by updating the GT-100 to Ver.2.

For details, refer to "[About GT-100 Ver. 2](#)".

### **[ Cautions ]**

When you update the GT-100 from Ver.1 to Ver.2, please check the following points.

- The Preset patch setting is also updated.
  - \* You can download Preset patches of Ver.1 from TONE CENTRAL.
- The settings saved as user patches in the GT-100 are held even after the update. ( New parameter settings added for Ver.2 are supplied when the GT-100 itself is updated. )  
Please import your user patch data stored in GT-100 Librarian to the GT-100 before the update.
- The maximum recording time for the phrase loop is changed to 32 seconds for monaural recording (16 seconds for stereo recording).

---

## **What you will need to update your GT-100**

- GT-100
- USB cable
- A computer with a USB connector ( Windows 8 / Windows 7 / Vista / XP, Mac OS X )

---

## **Caution when performing the update**

- Never apply this update data to any product other than the GT-100. This update data may destroy the data or system program of other products.
  - Never power-off your GT-100 while the update is in progress!  
If a power failure or similar accident occurs during the update process, the GT-100 won't be able to start up in normal operating mode. This will require servicing, so you will need to contact Roland service center near you if this occurs.
  - We regret that we are unable to answer questions regarding the update procedure using this system program. Please perform the update responsibly, following the directions given in this document.
-

### Getting the update file

Please open/extract the downloaded "gt100\_sys\_v203.zip" file on your computer to get the two update files named "ROMINFO.TXT" and "GT100ROM.BIN" in the "gt100\_sys\_v203" folder.

---

### Procedure for the update

#### Caution

- You must not rename the extracted files.
- Never turn off the GT-100's power while the update is in progress. Otherwise the system program or the GT-100 itself may be destroyed.

Please install the extracted system program files into your GT-100 according to the following procedure.

1. Adjust the **OUTPUT LEVEL** knob to minimum.  
\* Do not connect the GT-100 and the computer yet.
2. Hold down [ **SYSTEM** ] button and press and hold [ **POWER** ] switch.  
The message "GT-100 Updater" will appear on the display.
3. Connect the computer to the GT-100's USB port by a USB cable.  
The message "USB Connected." will appear on the display.
4. Open the BOSS\_GT-100 icon.  
"Removable Disk (\*:)" may appear instead of the BOSS\_GT-100 icon.
5. Copy (drag and drop) all the files included in the "gt100\_sys\_v203" folder into the "BOSS\_GT-100" icon.  
\* Do not copy the "gt100\_sys\_v203" folder but the files inside the folder.
6. Disconnect the BOSS\_GT-100 from the computer.  
With Windows 8 / Windows 7 / Vista / XP

Right-click on the "BOSS\_GT-100" icon in My Computer (or the "Removable Disk (\*:)" icon) and execute "Eject."

With Mac OS

Drag the "BOSS\_GT-100" icon to the Trash icon in the Dock.

7. Disconnect the USB cable.  
The message "Push [WRITE] to start" will appear on the display.
8. Press [ **WRITE** ] button to start the update process.
9. The message "Completed." will appear on the display when the update process completes.

10. Turn the GT-100 power off.

Please verify the version number "2.02" with the procedure described in "How to tell the version" part of this document.
